A Scape of Terror In India.

A Bengal postoffice superintendent has received from one of his Babu inspectors this report of an accident at a river which had to be forded owing to

the breakdown of a bridge:
"As I was to pass the river or water through my cart for absence of any boat some alligators ran on my oxen hence the oxen getting fear forcibly took away my cart in an abyss below the water of 12 feet which the cartman failed to obstruct. The oxen forcibly left the cart and fled to the other side of the river by swimming I myself being inside the matscreen of my cart the whole cart fell down in the abyss, I used to cry loudly at the time. The cart with myself was drowned in the meantime the Overseer Babu Mehendra Nath Ghose and my cook jumped on the water and took my cart in a place where 41/2 water then I myself jumped on the water and saved my life The alligators getting fear from the cart fled to the roadside and no sooner we came to the road they jumped on the water Had I been under suffocation for three minutes more then there was no hope of my life. * The nearest residents told thereafter that some men died this year in the abyss by the attack of the alligators. I am much unwell the voice of my speech is tallen low and out of order from the suflocation."-London Stand-

Bill Was Fooled.

"Seen anything of a feller round here with red whiskers an a squint?" queried Bill Sykes of Newberg, as he adjusted his red comforter and blew a sonorous blast from his bibulous acse preparatory to taking a little stimulant, "cause if you have I've got business with him He come to my house yes terday, an after talking around a spell an telling Hanner he thought she was my darter an making a tool of her he said he would have to inspect the well Sent out by the state, you know "Well, I got a pailful of water, an

he poured some in a sasser and looked at it through a milyscope Then I looked at it, an say, fellers, that water was full of alligators a foot long-microbes he called 'en. The upshot was I bought the mikyscope and some stuff to put in the well to kill the animals, an I paid him \$10, but 'twas partly Hanner's fault."

Here Bill looked around defiantly and continued: "That stuff was salt an water an there wan't no bugs They were painted on the glass to the mikyscope And with a rather derogatory renerk about the honesty of man generally Bill left in quest of the man with the squint. -Dowagiae Republican.

Difects of Imagination.

Some years ago a number of students in Europe were concerned in a charge which demenstrated the powerful effects of imagination. In a trolic they defined disguises and arrested another student, whom they tried in a theatrically arranged and dimly lighted chamber and condemned to death For several hours they kept their herror stricken vietim in a darkened room, and having informed him that he was to be beheaded Land aged his eyes and led him to another apartment.

A crowd was assembled, but restrained their mirth as the victim of the practical joke was forced to kneel down and placed his neck across the spindle of a three legged stool. They prepared for a great outburst of laughter as the neck of the poor young tellow was touched with a slender cane, but instead had to shed tears of regret ter the action, as immediately upon being tenched with the cane the young man tell

Magnetizing a Scap Bubbic.

Oxygen is a million times less "attractable" or "susceptible" than iron, and therefore experiments to show its attractability have to be extremely del-It was with one of them that Professor Fleming concluded his licture. He took a soap bubble-soap and water, by the way, being diamagnetic-and filling it with air placed it in the field of a very strong electro magnet. The bubble did not quiver. Then he filled another bubble with oxygen, and again turned on the current Instantaneously the Lubble inclined itself toward the magnet It bobbed back again when the current was turned off, but at a second attempt, when again the current was turned on, the attraction so unsettled it that it burst -Loudon Graphic.

Gunpowder Explosion.

The actual chemical result of the explosion of a charge of gunpowder cannot

be told with accuracy The general idea of what happens is that when the temperature of the igniting agent reaches 482 degrees F the sulphur bursts into flame, the saltpeter, acted upon by the heat, trees the oxygen with which it is highly charged, and, combining with the charcoal, forms car bonic acid and oxide, while the introgen is liberated

The Trans-Mississippi and International Congress is composed of delegates from every State and Territory West of the Mississippi river. The idea of this exposition originated in that Unigress at its reveion at Omaha in 1895, and the project has become a National suferprise at d the National Commission has been organized and is in active service, there being one commissioner for each of the several departments of the Government. Most of the Trans-Mississippi States are well along in the way of gathering exhibits from their respective States

ard many of them have made liberal appropriations, while others are preparing

exhibits through private enterprise. Vice-President H. E. Maxion of Reno, has made arrangements whereby he can get Navada exhibits, shipped from any point in the State along the line of the C. P. B. R., to Omaha and return, and he requests all persons who wish the interests of the State advertised, to co-operate with the Exposition County Commissioner of his county, whose name is shown above, and pres pure some product of his county and send it to the nearest point on the C. P R. R. from which place it will be sent to Custs and cabilited, and retued to the same point at the close of the exposition, free of expense to the extibitor Full information should accompany everything sent for exhibition. Before sending anything to the line of the railroad a full description should be given the Exposition Commissioner of the county, who in turn will notify the vice-President, who will notify him what action to take, otherwise there might be many duplications. PERSONAL INTEREST SHOULD NOT

The Virginia Report in last evening' issue takes Reuo severely to tack of the ground that she has made an "mitonuding and unheard of demand" fo the Silver Party State Convention and also claims that Reno has had ou-State Convention of the Silver Party. The Report must have been misinformed on two or three points or in its anxiety to have the State Convention held a Virginia allows its enthusiasm in thi particular direction to run away with its better judgment and does not state facts. If any decided effort has been made to have the convention held here. it certainly cannot be charged to the scheming of the Renoites, for nothin, of the sort has occurred. Reno as a matter of course would be glad to have the convention, but has simply awaited the meeting of the State Central Committee and will accept the situation whatever it may be.

As fac as having had a State Conven tion, it is true that the State mass meeting for the organization of the party was held here, but the nominat ing convention was held a few months the State Convention was held at Carson and two years ago at Elko. If the members of the State Central Committee at their meeting next Saturday can year, or in Virginia or Carson for that mateer, it should not be an occasion for someone who has a personal interest to fly into a tanteum. Doubtless memiers of the State Central Commit tes from all parts of the State will attend the meeting next Saturday and | tiago. will listen to the claims as they are presented by the representatives of each town desiring the convention and will act as their judgment dictates for to e best interests of the party and not for any single individual.

All of this talk about Reno's "adamantine cheek" and "immeasurable gali" and "bid for the convention" is a lot of idinita rot, for it is not believed that a move has been made as far as Reno te concerned for the convention. If the members of the state Central Committee see fit to call the convention here, the delegates will find superlor accommodations and a welcome.

Disputches from Madrid say the Spanish press is discussing the possibuilty of peace. The Conservative pa pere declare that Spain is now ready to ccept peace, provided it implies only the loss of Cuba.

But they say Spain would prefer war to the end if the United States should slaim Porto Rice, the Philippines or an immense indemnity.

It is now said that overtures for peace will be made through the French Ambassador at Washington.

Secretary Alger said he had received uo message from Shafter since that previously given out. He therefore thought matters were unchanged and that a flag of truce was still flying and negotiations going on for surrender.

The secretary of War has ordered guaranteeing satisfaction that the removal of all mines in harbors both in Price and Work of the United States take place at once. This action was decided at yesterday's Cabinet meeting. The engineers have later at Winnemucca. F. Leste is a can litate for a Sena | tion of the fact that the Anglo-Saxon race must dominate the world. I have lived to see the day when the two greatest nations of the earth have cast saids all fanciful prejudices and hand in hand stood forth defenders of liberty; to see in a Fourth of July procession the Star Spangled Banner floating beside the Union Jack, and the British military marching hand in hand with the American regiment. Truly, it was a glorious sight and to say it was appreciated by the thousands who witnessed the procession, one must have been here to realize the fact. Of course you have heard of the visit of British Columbia troops to Seattle, but should it not be so I send you a copy of the leading paper, which contains the full account of the celebration. I was indeed as truly a patriotic affair as I have witnessed since the times of the Rebellion, and will long be remembered in this fast growing and prosperous State.

With much pleasure I read of your home celebration, and, as on every occassion in which Nevada is concernd, wished to be there.

For poor old Carson's sake we all feel sorry to learn of the apparent breaking up of the Mint business; by 'we" I mean old Sage-Brushers, for all seem to cherish a kindly feeling "for the land they left behind them." Since the breaking out of the war the Alaska Klondyke fever has considerably abated and as a matter of course business is not so lively as before, although hope for the future is strong in consequence of the wonderful grain crops reported in every portion of the State.

At present very little political talk is heard, both sides predicting a vicory, but from what I can glean the G. O. P. seems to be considerbly in the ascendancy, but then you know that, as elsewhere, when affairs in that line are somewhat mixed, the outcome is hard to predict.

George Lyon is editor of the Populist evening paper and is etrong on the silver question, besides apparently eaning towards the Democracy, but ou (knowing the aristocratic gent so well) will not be surprised at any bange in his political sentiments. Gur friend has not been doing as well as he might, but to use the common Seattle expression, "He's all right."

I am pleased to state that there is every probability that George M. Stewart (Snowflake) will be appointed Postmaster. George is a very popular citizen, and just the man for the position. His many friends will be pleased to hear of the appointment. Bob Lindsay often speaks of jolly old Reno, as he calls it, and would gladly return thereto. He and Sam King are practicing law, but that profession, like the medical, is fearfully crowded and but few attorneys make more than a living, of yore.
